📄 Professional profile

Avid learner, self-taught, dedicated and highly motivated. I like to create products that have fun and clever features or that solve a problem for people. I especially love that it has both! But above all, I really love supporting my team to learn from them and them from me.

📄 Work experience

Frontend Engineer - Nov/2022 - Present - (Mexico City, Mexico)

Currently a member of the engineering team, I am in charge of updating, improving and supporting the company's backoffice platform, I support analysts from different countries such as Brazil, Colombia and Mexico. Developing with technologies such as React, Typescript, Redux, Git, Github and AWS.

Lead Frontend Developer - Oct/2021 - Nov/2022 - Zenda.la - (Mexico City, Mexico)

Interact with leaders from other areas and support and advise my team members. Reconstruction of the site and the web application which improved in UX, UI and SEO performance which at the same time has improved usability for end users. Responsible for the development and maintenance of a CMS to provide better management to the growth area, I provide support for the configuration of analytics for the data area. Developing mainly with Next.js, React, Styled components, MUI, Typescript, Redux and Ghost.

Fullstack Developer - May/2021 - Oct/2021 - Lapzo - (Monterrey NL, Mexico)

I was part of the engineering team, improving and maintaining the main platform, I also supported with code review and approval, I developed new reusable components and improved the loading speed of the application, I proposed and implemented a cleaner and more robust architecture in the backend service with typescript and I developed SQL queries to improve the application's search engine.

Frontend Developer - Oct/2020 - Apr/2021 - Sodisa - (Monterrey NL, Mexico)

I was part of the engineering team, I supported with the improvement of the UX and UI of the company's applications, eventually I took the lead role for a frontend project, I published an embedded application within the Shopify store using Next.js and Typescript, which caught the attention of new users, I also gained knowledge of methodologies such as clean architecture and SSR.
